

Tougher & Longer Lasting Than Silicone Coated Films!

CELEBRATING 45 YEARS OF INNOVATIVE HISTORY IN THE PRINTING INDUSTRY

Engineered with exact tolerances, the microscopic glass beads in SUPER SEE™ anti-marking films are designed specifically to reduce surface area contact with the freshly printed substrate.

The uniform surface of SUPER SEE™ anti-marking film provides even support across the entire substrate. The film is remarkably flexible and will maintain bead adhesion even under the most intense conditions and our proprietary coating is tougher & longer lasting than silicone coated anti-marking films.

- Available in Cut Sheets and Converted Jackets
- Option of Small and Large Bead
- Custom cut sheets can be clamp mounted or double sided tape mounted
- Heidelberg OEM Hardware on Converted Jackets
- Bead consistency allows for longer runs and less washing
